**3. Read the texts and underline the correct response for each question item below them. (10 marks)**

“Robotic warfare is open-source warfare,” Singer said. “The technology is highly commercialized and affordable. With \$1,000, an enemy could build a drone that has roughly the same capabilities of the Raven drones used by our soldiers in Iraq,” Singer said. The Raven is a small drone used as a scout by ground troops. During the Israeli invasion of Lebanon in 2006, Hezbollah fighters fielded at least four drones.

.....
